

Aim: To try & get the frogs to the opposite 3 lily pads so the green frogs are looking to the left of the screen, & the white frogs are looking to the right of the screen.

A frog can only move one lily pad at a time or can jump a single frog to move forward two lily pads!

Once you have moved a frog, you cannot move them back. The frogs only move in the direction they are facing.

Equipment: Use 6 spot markers & tennis balls/bean bags to represent the frogs. Make sure they are easy to distinguish

between the two colours. Alternatively, you could use each other if there are 6 in the group (leapfrog). Colour bands should be used if using the leapfrog format!
